

MC60023AC Charge Air Cooler

Our MineCool upgrades for the 793F CAC include the following enhancements:

- **Reinforced manifolds**

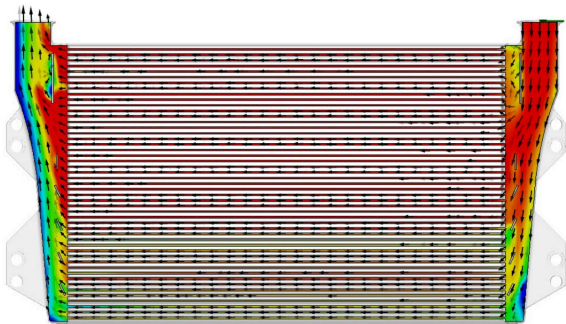

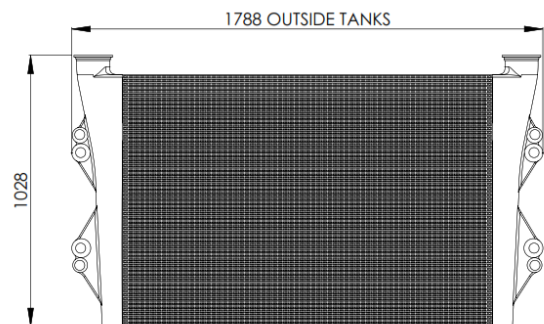

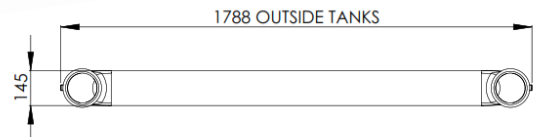

Upgraded with thicker walls to increase durability and withstand harsh operating conditions.

- **Optimised internal design**

Strategically positioned splitters and baffles within the tanks enhance structural integrity and fluid control.

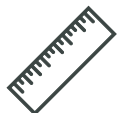

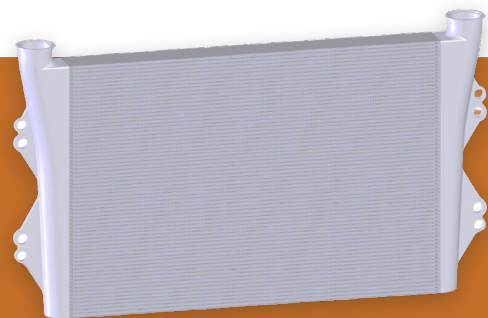

- **Engineered to deliver up to 30% improved cooling efficiency.**

These improvements result in significantly stronger tanks and help reduce the risk of cracking - a common issue with standard OEM models.

Why MineCool?

MineCool is Australia's alternative to **aftermarket OEM components** - offering market-leading **reliability, performance and value.**

FIT FOR PURPOSE

MineCool components are engineered to keep your assets running for longer.

BUILT TO LAST

Our products are stronger and more robust, built to meet or exceed OEM outcomes.

UNMATCHED CONVENIENCE

We offer the best product availability and speed to market in the industry.

DEPENDABLE QUALITY

Our products are proven to perform.
